

Click Stream Analytics

The very first alternative to the standard SAP Portal Activity Report (PAR) and Activity Data Collector (ADC) for tracking your portal usage.

- **Discover hard to get data** (i. e. resolutions, browsers, languages, etc.) so your IT can develop with confidence.
- **Click Stream creates reports** on specific roles and groups or any other criteria using your portal's UME and PCD.
- **Determine your portal usage** based on hard numbers (user and content history) with easy to read reports.

www.sweetlets.com/clickstream

Click Stream's dashboard (back) shows your SAP Portal usage stats at a quick glance while the Traffic Report (front) displays page views vs. users and their logins.

BW TREE

BW Tree retrieves all end-user reports at run-time – then displays them in a nice tree.

- **Access to all Web Reports and Workbooks** in one place.
- **Avoid double maintenance** between portal and BW.
- **Allow end-users to pick their favorites.**
- **Connect to multiple BW systems.**

www.sweetlets.com/bwtree

Access all your end-user BW reports at run-time – from a nice, organized tree.

Why you should use Sweetlets applications in your SAP Portal

- Be running in 20 min or less – Quick install with EPA file.
- Easy set-up – An out of the box business package.
- Seamless integration – SAP NetWeaver Portal specific.
- Low maintenance – Compatible with all future service packs.
- User-friendly – Increase user interaction.
- **HANA compatible**

And this is why Sweetlets...

- Involved in the very first SAP Portal installation way back in 2002 (SAP Enterprise Portal 5.0 together with SAP).
- Exclusive focus on user-friendly business packages developed specifically for the SAP Portal (7+ years).
- We provide software and support to a wide range of industries and serve portals up to 150,000 users strong.

Use any or all Sweetlets applications in your SAP Portal today. Free, fully functional versions available for test drive.

www.sweetlets.com/downloads

Events Calendar

Set up a department specific events calendar to coordinate company meetings, area holidays, office functions, and any special occasion.

- **Deploy multiple calendar** iViews on the same or different pages ... with the same or different content.
- **Retrieve/import** event data from R/3.
- **Assign custom recipient** group/role/user events to keep all your users up to date and current – with respect to their area.
- **Special events alert** – Schedule a celebration for everyone to see, or plan ahead for office functions.

www.sweetlets.com/eventscalendar

Pretty Poll

The interactive Pretty Poll voting iView allows you to create quick polls within your SAP Portal ... then with little effort, analyze the results.

- **Quick and easy WYSIWYG** poll set up. Adding excitement and fresh content in your portal has never been easier.
- **Benefit from a wide variety** of poll configuration options (single/multiple choice, help links) and real time results.
- **Amplify interaction** with your end users by building a solid team atmosphere and enhancing company awareness.
- **Deploy multiple poll iViews.** Target specific groups on a variety of pages in different areas.
- **Anonymous user voting.**

www.sweetlets.com/pretypoll

Pretty Poll's user-friendly interface provides three different vote display options.

Quick Links

Our clients were looking for a more user-friendly alternative to the standard Portal Favorites. As a result, we developed Quick Links.

- **Super intuitive** user interface with an easy to read tree view structure (folders/sub folders) and drag-and-drop functionality.
- **Link distribution** for admins pushes information to specific user communities. Educate and guide your users along.
- **Basic Statistics** show the usage and acceptance among your users – no more guesswork.
- **Deploy multiple** quick links iViews with same or different content on many pages.

www.sweetlets.com/quicklinks

Quick Links administration view with Push Links feature and easy access to key statistics.

RSS Express

Easily integrate company or external RSS feeds into your SAP Portal.

- **Display** multiple RSS feeds in one iView to keep your end users up to date.
- **Pre-populate** iViews with content from sources relevant to your audience (specific, department or company as a whole).
- **Cached feeds** to maximize performance and minimized traffic load keeps your portal running lean.
- **Information compiled** from RSS feeds via HTTP or HTTPS (displayed in a personalize-able iView).

www.sweetlets.com/rssexpress

SSO Express

Single Sign-On Express manages all relevant user names and passwords to one handy iView ... *at the click of a mouse.*

- **Maintain a large set** of user-password combinations at your fingertips (Internet and intranet supported).
- **Combining user-specific** and enterprise-wide applications in one launchpad allows your users single-sign-on access.
- **Multiple iView deployments** (separate/shared application lists) with flexible layout, styling and group settings.
- **Integrate company global user passwords.** Access to enterprise accounts without publishing user credentials.

www.sweetlets.com/ssoexpress

SSO Express end user view – Easy maintenance for user and password information.

Stock Ticker

A small but very helpful tool when it comes to displaying real-time activity for company related stocks, index and/or currency trading.

- **Simple and graphically intuitive** quick reference on any stock price, index or currency.
- **Automatic background refresh** using Ajax keeps trading activity up to date.
- **Integrated RSS news** updates users on any business-relevant stock or the latest market new.
- **Deploy multiple Stock Ticker** iViews with same or different content on many pages.

www.sweetlets.com/stockticker

System Messenger

Broadcast instant or scheduled messages to your users (designed after SAP R/3 System Messaging & previously unavailable in the SAP Portal)

- **First and only messaging** system available for the SAP NetWeaver Portal.
- **Create distribution** lists for specific roles, groups or user directories. Pushing messages has never been easier.
- **Schedule messages** and set up templates for re-occurring messages – Plan ahead for portal downtimes.
- **Broadcast instant alerts** to quickly inform your users on portal emergencies, navigation or content changes.

www.sweetlets.com/systemmessenger

World Times

Choose your own locations and let World Times show the current time and weather with forecast ... all in one handy iView.

- **Select your own locations** to display – never waste time figuring out what time it is in another part of the world.
- **Deploy several iViews** in various areas of your SAP Portal – each with a unique style.
- **National/state/country/religious** holiday information improves your project planning at foreign offices.
- **Automatic adjustment** for daylight savings – so you don't have to.

www.sweetlets.com/worldtimes

"The implementation of the Sweetlets applications (World Times and Events Calendar) has transformed our homepage and we have received many positive comments from our employees."

Thomas Breat, Senior Consultant at Bombardier Transportation Germany
